SKETCH PLACEMENT OF OPTIONAL POCKETS ON VEST

Front Measurements

Top of Shoulder to belt	A.	C.
Center (notch to belt)	B.	
Center (top of vest to belt)		D.
Center (notch to top of vest gap)		E
Center (Bottom of vest to belt gap)		F.
Waist	G.	
Chest	H.	

- A) Measure from top center of shoulder down to top of duty belt**
- B) Measure from the center notch in your clavicle to your top of duty belt.**
- C) Measure from the top center of shoulder down to top of duty belt with your vest panels on.**
- D) Measure from top center of your vest down to your duty belt**
- E) Measure from the center notch in our clavicle to the top center of your vest (the gap between the clavicle notch to your vest)**
- F) Measure from the bottom center of your vest to the top of your duty belt (the gap between your vest and duty belt.**
- G) Measure your waist at the skinniest part.**
- H) Measure the width of your chest from arm pit to arm pit**

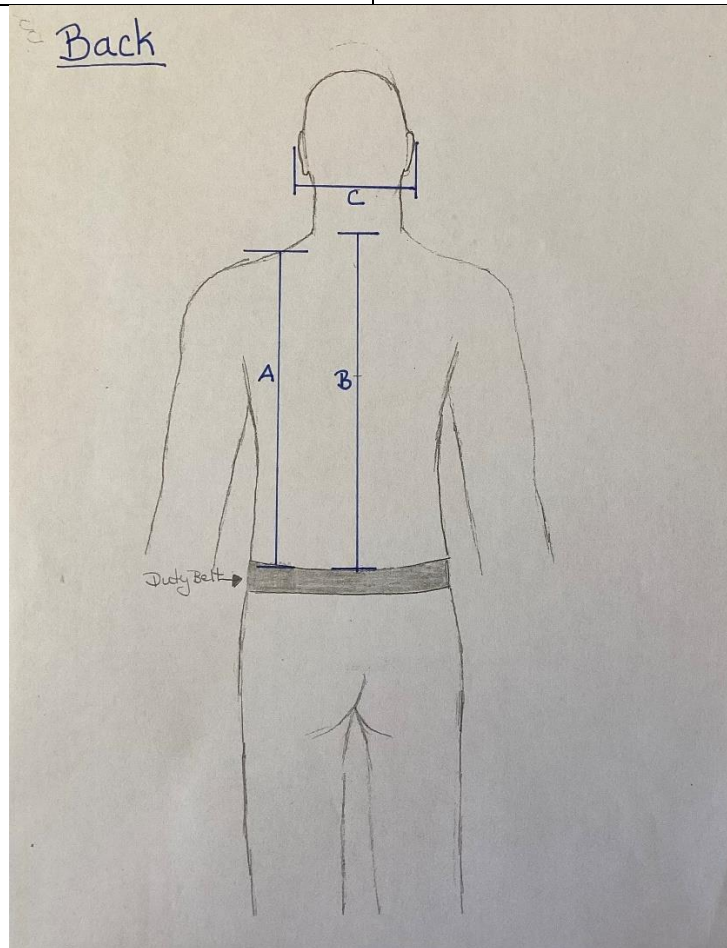

*Please have someone else measure you. Call or video chat if needed. (This is for all measurements)

** Measurements A, B, G, and H need to be measured with your duty belt on but not your vest.

***Measurements C, D, E, and F need to be measured with your duty belt on and your vest panels on and situated to where you would like your panels to sit on you. This helps me pattern, so your panels sit properly on you. It is your responsibility to make sure they are properly sitting where they are needed to keep you safe.

Back Measurements

Top of shoulder to belt	
Center (notch to belt)	
Neck measurement	

- A) Measure from the top center of shoulder to top of duty belt.
- B) Measure from center knot (big knot in the center between shoulder blades) to top of duty belt.
- C) Measure in a straight line from about $\frac{1}{2}$ inch on both sides of the ear. 8 inches is the most common neck measurement, 7 to $7\frac{1}{2}$ is common for a smaller officer. If you are too big with your measurement the shoulders will be too far out on you, if you are too small with your measurements your head won't fit through the head hole. Please reach out with any questions.

Draw Side: Right _____ Left _____

Tracings

Please trace your vest panels by taking them out of the sleeves they come in. Trace them as close to the actual panel as possible, do not add space around the panel as this will cause your external carrier to be too big. When tracing please do not trace the Velcro tabs on the shoulders, just the actual panels. If you do trace around the Velcro tabs, please make sure to indicate where the panels end in the shoulder area on the tracings.

Trace the front and back panels separately. **DO NOT** trace them back-to-back as I need to cut them out to trace them onto the pattern paper to create your pattern.

Agreement/Acknowledgement Page

Please initial beside each statement of agreement/acknowledgement.

___ I agree to ensure the completed external vest carrier fits properly, and vest panels are sitting in the correct position within 2 weeks of the carrier being delivered.

___ I acknowledge that it does take a week or so for the external vest carrier to form to my body and panels, and that it will be stiff at first.

___ I agree and acknowledge that I am responsible for the cost of any layout changes after the layout has been approved by me, and the carrier has been completed.

___ I agree/acknowledge that I am responsible for ensuring my external vest carrier is safe and there are no safety concerns within 2 days of receiving it. AlaskHahn Creations will do their best to suggest different layouts if they see any safety concerns, but even those layouts may not work once I have the external vest carrier loaded with equipment, and duty belt on. I am responsible for immediately reaching out to AlaskHahn Creations to work out a plan to correct the safety concerns.

___ I agree to pay the materials fees and extra fees upon placing order. I agree to have the remaining balance paid once vest is started.

___ I agree that once AlaskHahn Creations has cut out my external vest carrier, the materials fee will not be refunded if I so choose to cancel my order.

___ I acknowledge that the external vest carriers made by AlaskHahn Creations take time, and I agree to not try and get them to bump my order ahead of others. I acknowledge that AlaskHahn Creations will complete my external vest carrier as soon as possible.

___ I agree to treat AlaskHahn Creations with kindness and respect.
